Demonstration Chris was a success

A big thank you to all the visitors of our joint demo. We never dreamed that we would get more than 80 visitors on the field during the season. Because of all the positivity, good conversations and compliments, it was a very successful day for us.

We would like to share a few reactions from visitors:

- What a great machine: it's practical, made for the grower and maximally efficient
- This is the best demo of an asparagus harvester I've ever seen
- Good price, quality and above all capacity ratio: It pays for itself in no time
- No fuss, a machine that works
- It's great to hear and see how a grower with 4 years of experience uses the machine in such a flexible way. Harvesting, cleaning up the beds, absorbing peaks, planning, cost savings and a lot of peace and quiet in the company
- What a beautiful back it builds
- How nice to see it on a really productive field
- My employees never reach 50kg per hour per person
- With a 2nd pass it goes almost twice as fast, which is fast
- It's unbelievable what happens to hand harvesting in an asparagus bed. We don't normally see that
- With this way of harvesting you also have some short ones, but what is "smashed" with the hand harvest is probably much more
- What a beautiful quality asparagus. Never thought that those asparagus could grow in that stretch film like this
- The asparagus is indeed very high on top
- What a beautiful combination
- This is the future

During the demo, an explanation was given about the trial that is currently running on the 3ha plot next door. After the season, we will collect all the data. Those who are interested in the results can send an email to us: info@machiningmatters.com

If you missed the demo and still want to see it again, you can also contact the above e-mail address or by phone: 0475594869
